📍 Coimbatore, Tamil Nadu

ABOUT ME

Motivated Computer Science student with strong foundations in programming and problem solving. Skilled in Python, web development, and software design. Passionate about building efficient software solutions and eager to contribute technical skills in a challenging development role.

PROJECTS

NIVIBOT – Autonomous Underwater Robot

Developed an autonomous underwater robotic system capable of intelligent navigation and obstacle avoidance. The project integrates machine learning-based obstacle classification with A* path planning to compute optimal routes in underwater environments.

Emotional Cipher – AI Emotional Safety Monitoring System

AI-based emotional monitoring system to detect emotional distress patterns and provide early alerts.

Focused on building a continuous emotional safety solution that can support user well-being.

ThermoFin: AI-Driven Thermal Simulation for High-Performance Chips

ThermoFin is a web app that predicts chip cooling efficiency using FDM simulations and a Random Forest model, enabling fast and accurate thermal analysis for high-performance processors.

WORK EXPERIENCE

CODTECH IT SOLUTIONS – Full Stack Developer Trainee

Working on real-world projects using React and MongoDB, with hands-on experience in building scalable web applications and deploying them on VPS servers.

IT TRAINING HUB – Full Stack Development Trainee

Developed responsive front-end interfaces using HTML, CSS, and JavaScript, assisted in backend development and API integration, and gained practical experience in version control, deployment, and collaborative software workflows.

SKILLS

- React
- Python
- MongoDB
- FastAPI
- Linux Basics
- Node.js
- C/C++
- Docker
- Git and GitHub
- OOP Basics
